

By Joining energy saving campaign the educational institutes and other organisations will be benefitted through reduction of energy consumption by adopting suggested energy conservation tips.

Students from registered educational institutes will get knowledge about energy conservation techniques and develop the habit of energy conservation, which will reduce energy consumption of their house as well as school. These Energy Saving Warriors will also motivate their friends & relatives for adopting energy saving techniques. Energy consumption reduced in various organisations, institutes and residence of students/ teachers will help the nation & the world by reducing carbon foot print; and thus will reduce the impact of global warming.
